# How to Create Persistent Links to A. R. Dykes Library's Electronic Content

Creating persistent links to library content allows students to reach full-text articles on- and off-campus. No broken links. No troubleshooting later. Just durable links that work every time.

The most frequently used permanent link is the Digital Object Identifier (DOI). A DOI is a standardized method for identifying an electronic object. DOIs often appear in the citation of an article and provide a unique and persistent link to digital documents.

## Find a DOI in PubMed

1. Go to A. R. Dykes Library's web page http://library.kumc.edu/

2. Click the **PubMed** icon located in the left navigation.

3. Under **PubMed Tools**, click **Single Citation Matcher**.

4. Type in the citation information for the article you would like to use. If you know the **PubMed ID** type it into the **Title words** field.

5. Click **Search**.

6. The DOI will be located within the citation above the article title.

**Regulation of crp gene expression by the catabolite repressor/activator, Cra, in Escherichia coli.**

Zhang Z[1], Aboulwafa M, Saier MH.

⊕ **Author information**

**Abstract**

Growth of E. coli on several carbon sources is dependent on the catabolite repressor/activator (Cra) protein although a Cra consensus DNA-binding site is not present in the control regions of the relevant catabolic operons. We show that Cra regulates growth by activating expression of the crp gene. It thereby mediates catabolite repression of catabolic operons by an indirect mechanism.

7.  If a DOI does not appear, click the KUMC's FIND IT! Icon, located in the right hand corner.

8.  The DOI will be located under the **Journal** title.

**You are looking for:**

Regulation of crp gene expression by the catabolite repressor/activator, Cra, in Escherichia coli.
Author:  Zhang, Z  Date:  2014
Journal:  *Journal of molecular microbiology and biotechnology.*     Volume:  (24)  Issue:  3.   p.135 - 141.
DOI:  10.1159/000362722   PMID:  24923415     Edit citation details

**Full Text Online** in  ProQuest Nursing & Allied Health Source   Details

9.  **Please note: Not all articles will have a DOI.**

# Check to Make Sure the DOI is Linking Properly

10. Go to DOI's web page http://dx.doi.org/

11. Copy and paste the DOI number into the **doi** field, click **Go**.

## Resolve a DOI Name

doi: 10.1159/000362722

Go

Type or paste a DOI name into the text box. Click Go. Your browser will take you to a Web page (URL) associated with that DOI name.

Send questions or comments to doi-help@doi.org.

Further documentation is available here.

12. This will lead to the article; click on the PDF to make sure full text access is available from the Dykes Library. If a login or payment screen appears, the issue may be A. R. Dykes Library does not subscribe to this e-journal or the DOI is not linking correctly. If this happens, use Citation Linker to create a durable link.

## Add a Prefix to the DOI

13. Once a DOI has been obtained and verified, link the item to your course.

14. Add the prefix http://dx.doi.org/ to the DOI to resolve the link.

15. Example: http://dx.doi.org/ + 10.1111/j.1365-2834.2010.01076.x = http://dx.doi.org/10.1111/j.1365-2834.2010.01076.x

16. Paste this link into your course for student use.

# Find a DOI in CINAHL

1. Go to A. R. Dykes Library's web page http://library.kumc.edu/

2. Click the **CINAHL** icon located in the left navigation menu.

3. Type in the article title in the search field, click **Search**.

1. An evaluation of the nursing practice environment and successful change management using the new generation Magnet Model

Academic Journal

(includes abstract) Grant B; Colello S; Riehle M; Dende D; Journal of **Nursing** Management, 2010 Apr; 18 (3): 326-31. (journal article - research, tables/charts) ISSN: 0966-0429 PMID: 20546473 CINAHL AN: 2010643715

Abstract: Aim: To discuss the **new Magnet Model** as it relates to the **successful** implementation of a **practice change**. Background: There is growing international interest in the **Magnet** Recognition Programme. The latest **generation** of the **Magnet Model** has been designed not only as a road map for organizations seeking to achieve **Magnet** recognition but also as a framework for **nursing practice** and research in the future. Evaluation: The **Magnet Model** was used to identify success factors related to a **practice change** and to evaluate the **nursing practice environment**. Key issues: Even when proposed changes to **practice** are evidence based and thoughtfully considered, the nurses' work **environment** must be supportive and empowering in order to yield **successful** and sustainable implementation of **new practice**. Conclusion: Success factors for implementation of a **practice change** can be illuminated by aligning environmental characteristics to the components of the **new Magnet Model**. Implications for **nursing management**: The **Magnet Model** provides **an** exceptional framework for building **an** agile and dynamic work force. Thoughtful consideration of the components and inter-relationships represented in the **new model** can help to both predict and ensure organizational vitality.

**Subjects:** Change Management; Empowerment; Leadership; Models, Theoretical; Nursing Practice

6. Notice: This DOI has the prefix (http://dx.doi.org/) added already. Click the DOI link to make sure it is linking properly; this will lead to the article. Click on the PDF to make sure full-text access is available from the Dykes Library. If a login or payment screen appears, either the A. R. Dykes Library does not subscribe to this e-journal or the DOI is not linking correctly. If this happens, use Citation Linker to create a durable link.

7. Paste this link into your course for student use.

8. Please note: Not all articles will have a DOI.

# If a DOI is Not Available: Using Citation Linker

1. Go to A. R. Dykes Library's Citation Linker web page

   http://mt8fd2he2v.search.serialssolutions.com/?SS_Page=refiner&SS_RefinerEditable=yes

2. Type in the citation information for the article you would like to use. Please note you must include a **Journal**

   title, **ISSN**, or **PMID**. If you know the **PubMed ID** type it into the **PMID** field.

3. Click **Look Up**.

Notice this article does not have a DOI located below the **Journal** title.

4. Click the **Full Text Online** icon; this will lead to the article. Click on the PDF to make sure full-text access is

   available from the Dykes Library.

# Create a tiny URL

Use the TinyURL website when your URL has a large amount of characters and is complex. Creating a TinyURL is convenient for instructors and students to keep them organized and it is less likely to have a broken link.

1. Go to Tiny URL's web page www.tinyurl.com

2. Copy and paste the URL from the **Citation Linker** page into the **"Enter a long URL to make tiny:"** field and click **Make TinyURL!**.

3. Paste this link into your course for student use.
